

Superautomatic Grinder Cleaning Guide

Just like standalone grinders require cleaning, so too do grinders within superautos to remove rancid oils and particles that remain in grinder burrs. Urnex's SuperGrindz are uniquely formulated cleaning tablets that repel water, making them an ideal solution for cleaning superautomatic grinders.

Products used:

- SuperGrindz

Dosing

- Use 1 capful (26 g) of SuperGrindz for each hopper.

Tips

- SuperGrindz can also be used in standalone espresso and shop grinders.
- If used in an espresso grinder, use 1 capful (26 g) of SuperGrindz per hopper.
- If used in a shop grinder, use 2 capfuls (52 g) of SuperGrindz.

Step 1

Remove all coffee from the bean hopper and return the empty hopper to the machine.

Step 2

Brew the largest cup size 2 times to remove all coffee that remains in the chamber.

Step 3

Add 1 capful of SuperGrindz to the bean hopper.

Step 4

Add 3 capfuls of coffee beans to the same bean hopper.

Step 5

Brew the largest cup size 5 times, or until there are no traces of SuperGrindz remaining in the cup or in the discarded pucks of coffee grounds.
