

Etlund #1 and #2 Manual Can Openers

Etlund Company invented these original can openers over 75 years ago, and they have set the standard in Foodservice ever since. Now we've improved them to meet the even tougher requirements of today's Foodservice operations. With a new smoother action base design, long wearing spool and rust resistant arbor, you just can't copy our quality.

① New Delrin plastic spool reduces friction against handle to improve wear

② New base design for more rigidity

③ New Melonite arbor provides greater rust resistance to make gear changing easier

④ New replaceable plastic base insert provides smooth glide action and reduces wear on opener shaft

“Old Reliable” is now even more dependable.

#1 with long bar and optional cast iron base

#8 features a rotary style opening mechanism similar to our electric openers

#1, #2 and #8 models available with plated or stainless steel bases

FEATURES:

- Rust resistant arbor
- New base with plastic insert
- Delrin plastic bushing reduces friction against handle to improve wear.
- #8 has rotary blade that automatically pierces can
- Made in U.S.A.
