THIN THICK PARTICULATE
See category tab for details.

Bid Description

The BP-line is designed to dispense directly from a food manufacturer's container. The one-piece discharge tube with over-molded black knob has only a few parts. And clean-in-place certification makes maintenance a breeze.

BP-1 models, have a maximum stroke of 1 ounce (30 mL) with collars supplied to reduce portions in 1/4 ounce (7mL) increments. BP-1 88000 pumps directly from a 38 mm jar opening; jars can be as short as 7" (17.8 cm). The BP-1 88010 fits a Heinz® Pour Store & Pump Jug. The black plastic lid threads onto the jug. BP-1 CROCK 88020 features a clear plastic lid that fits a standard 2.7 quart (2.6 L) salad crock.

Fractional BP pumps (1/4 and 1/2) are designed to dispense syrups directly from a manufacturer's bottle with a 28 mm opening. BP-1/4 and 1/2 have a 1/4 oz (7 mL) or 1/2 oz (14 mL) stroke respectively.

Standard Features

Stainless steel pump with plastic cylinder has few parts

BP-1 has a 1 oz (30 mL) stroke with portion control

Black knob can be engraved to identify contents (available upon request, contact our customer service department)

Pump breaks down completely for cleaning or can be cleaned in place

Warranty

Server Products equipment is backed by a two-year limited warranty against defects in materials and workmanship. For our complete warranty statement, see our web site or contact us.

CAD Library

Individual CAD images can be downloaded from product pages on our web site. We are also a member of The KCL CADalog with more than 100 other manufacturers. Our complete collection of CAD files can be purchased through Kochman Consultants, Ltd. at kclcad.com.
